

You have been awarded with the **HTB Certified Penetration Testing Specialist certification** for successfully completing all requirements and criteria through the examination.

We are happy to see a new penetration tester ready to practice the skills acquired directly in the field, and we wish you days full of enumeration, exploitation, and privilege escalation. But however this goes, the most important thing is to **keep upskilling** and **make a safer cyber world together**.

Enjoy your swag and your physical certification!

KEEP HACKING!
