You have been awarded the **HTB Certified Defensive Security Analyst** certification for successfully completing all requirements and criteria through the examination.

We are happy to see a new **Defensive Security Analyst** ready to practice the skills acquired directly in the field, and we wish you days full of **log analysis, SIEM exploration,** and **incident-handling activities.** However this goes, the most important thing is to **keep upskilling** and **make a safer world together.**

Enjoy your swag and your physical certification!

KEEP HACKING!
